STUDY: Inclusive Approaches Essential For LGBTQ-Inclusive Curriculum

This week, the Gay-Straight Alliance Network released a new study evaluating the effectiveness of implementing LGBTQ-inclusive curricula in schools. Previous studies have already shown that having an inclusive curriculum helps make schools safer for LGBTQ students, but this study shows that other factors can impact just how effective the inclusive classes can be.

For example, if teachers do not have the proper resources, including professional development, supplemental instructional materials, or updated textbooks, the LGBTQ curriculum was more difficult to implement. This is especially true in the absence of administrative and community support, requiring teachers to shoulder the burden of the materials to implement the lessons.
